

**GREAT HARWOOD**

**Annual Report**

of the

**Medical Officer of Health**

and

**Inspector of Nuisances.**

**1914.**

ST. HUBERT'S LODGE,  
GREAT HARWOOD,  
*March 1st, 1915.*

*To the Chairman and Members of the  
Great Harwood Urban District Council.*

GENTLEMEN,

I have the honour in again presenting to you my Annual Report on the health and sanitary condition of your District, along with the returns of births and deaths for the year ending December 31st, 1914, together with Local Government Board Forms 1, 2, 3, 4, and Form C. for the Lancashire County Council.

Great Harwood is situate in a somewhat hilly district about five miles North-East of Blackburn, and is in the Darwen Parliamentary Division.

The inhabitants are chiefly engaged in the manufacture of cotton goods.

The chief streams flowing through the district are the River Hyndburn (which discharges into the River Calder) and forms the boundary on the East side, the Dean Brook on the North side, and the Norden Brook on the South Side.

These streams are comparatively free from the pollution one so often finds in manufacturing districts.

The houses which are of a modern type are constructed chiefly of stone and good bricks.

The land on which the town is built slopes in a south-easterly direction, and this allows a good share of sunshine, besides rendering great aid in its rapid and complete drainage

The district covers an area of 2,868 statute acres, and contains within its boundaries the Dean Clough Reservoir, from which it draws its water supply. This consists for the most part of upland surface water. The reservoir is situated well out of the town and protected from sources of pollution.

The inhabitants, on the whole, are very industrious and thrifty, and as I have previously stated, are chiefly engaged (both male and female) in the Cotton Mills.

The population of the District in 1880 was 6,281, and at the last census 13,815. The present estimated population is 14,000.

During the year we have had 1334 hrs. 39 mins. sunshine, and 51·28 inches of rain. The following is a monthly summary :—

		Sunshine.		Rainfall.
		Hours.	Minutes.	Inches.
January	...	23	50	4·40
February	...	55	9	3·12
March	...	82	20	5·96
April	...	193	20	1·84
May	...	138	17	2·42
June	...	204	40	2·94
July	...	138	55	4·78
August	...	186	18	3·19
September	...	167	43	5·36
October	...	61	5	2·72
November	...	57	7	7·54
December	...	25	55	7·01
		-----		----
		1334 hrs.	39 mins.	51·28 inches.

During the year 311 births have been registered, viz :—138 boys and 173 girls. Estimating the population at 14,000, this gives a yearly birth-rate of 22·21 per thousand of the inhabitants.

This is the highest Birth-rate recorded since 1908. The birth-rate for 1913 was 19, and for the five previous years 19.26.

The deaths during the same period numbered 156, viz :—68 males and 88 females. This gives an annual death-rate of 11.14 per 1,000 of the population.

12 of these deaths occurred outside the district, leaving 146 or 10.57 actually occurring in Great Harwood.

The death-rate for 1913 was 12 per 1,000, and for the five previous years 11.05.

The ages at which death occurred were :—

Under 1 year of age...	...	..	...	...	...	30
Between 1 and 2 years of age	...	...	...	...	...	13
„ 2 „ 5	„	...	...	...	...	5
„ 5 „ 15	„	...	...	...	...	4
„ 15 „ 25	„	...	...	...	...	7
„ 25 „ 45	„	...	...	...	...	22
„ 45 „ 65	„	...	...	...	...	41
65 years of age and over	...	...	...	...	...	34
Total						156

The death-rate amongst children under one year of age per 1,000 births was 96.46, compared with 97.37 during 1913, and for the five previous years 93.2.

The causes of death in children under one year of age were :—

Measles	...	...	...	...	...	1
Pneumonia	...	...	...	...	...	6
Diarrhœa and Enteritis				...	...	4
Meningitis	...	...	...	...	...	5
Premature Birth	...	...	...	...	...	7
Marasmus	...	...	...	...	...	2
Tuberculous Diseases	...	...	...	...	...	3
Other causes	...	...	...	...	...	2
Total						30

The causes of death at all ages were :—

Various Diseases of the Respiratory Organs ... ..	26
Diseases of Heart ... ..	14
Phthisis and other Tubercular Diseases ... ..	15
Various Cancerous Diseases ... ..	13
Diarrhœa and Enteritis ... ..	4
Premature Birth ... ..	9
Influenza ... ..	1
Erysipelas ... ..	1
Whooping Cough .. ..	1
Diphtheria ... ..	2
Measles ... ..	9
Puerperal Fever ... ..	2
Meningitis ... ..	5
Bright's Disease ... ..	3
Cirrhosis of Liver ... ..	1
Cerebral Hæmorrhage and Apoplexy ... ..	8
Senile Decay ... ..	12
Suicide ... ..	2
Violent Deaths ... ..	1
Other causes not necessary to particularise ... ..	27
<hr/>	
Total ...	156

19 persons have died who were over 70 years of age, one of whom had reached the advanced age of 93, and one each 80, 81, 85, 86 and 90 years respectively.

During the year the following cases of Zymotic Diseases have been notified to me, viz :—19 Pulmonary Tuberculosis, 5 other Tuberculous diseases, 82 Scarlet Fever, 15 Diphtheria and Membranous Croup, 12 Erysipelas, 3 Puerperal Fever, and 1 Ophthalmia Neonatorum, Total 137.

During the year 19 Deaths have occurred from Zymotic diseases, viz :—7 Pulmonary Tuberculosis, 8 other Tuberculous diseases, 2 Diphtheria, and 2 Puerperal Fever.

The Zymotic death-rate is 1·35 per 1000, against a death rate of 1·28 in 1913, and 1·21 in 1912.

You will observe that 82 cases of Scarlet Fever have been notified. These have continued throughout the year and have occurred in various parts of the district. The cases were mostly of a mild type and fortunately no deaths have resulted.

During the month of May there was an outbreak of Measles, principally occurring in children attending the Infants department of the Girls' National School, and it was deemed advisable to close this school from May 18th to June 8th.

Unfortunately 9 deaths have occurred from this disease during the year.

In the autumn months of the year Whooping Cough became very prevalent, and on November 2nd, it was again deemed advisable to close the Infants department of the Girls National School to the end of the year.

On account of the spread of this disease, on November 26th, it was decided to close two other schools, (St. John's Infant's Department, and the Council School Infants Department), and these remained closed also until the end of the year.

Whenever an infectious disease is notified, the house is visited, disinfectants supplied, verbal and printed instructions given with regard to isolation and prevention of the spread of the disease, and if possible the source of origin is traced.

After each case, disinfection of the room and its contents, bedding, clothing, etc., is carried out. 118 cases were so treated during the year.

In cases of Tuberculosis the same action is taken, and a copy of the instructions issued by the Local Government Board supplied, but the removal of a patient to a Sanatorium is vested in the County Council Tuberculous Medical Officer. 12 patients have been removed to various Sanatoria during the year from this district.

The arrangements made with the Accrington Corporation whereby infected bedding, clothing, etc., can be conveyed and disinfected at their disinfecting station are still in operation.

During the summer months (when Diarrhoea is apt to make its appearance) handbills were circulated giving instructions with regard to cleanliness and limewashing, and the protection of food from flies, etc.

The following is a statement of the closet accommodation in the district :—

Pail Closets (Out-districts)	...	36
Earthenware Tanks	... ..	120
Fresh Water Closets	... ..	412
Waste Water Closets	... ..	2663
		<hr/>
Total	...	3231

The Sewage undergoes treatment by continuous precipitation and irrigation at the Clayton-le-Moors and Great Harwood Joint Outfall Sewage Works. A scheme for extension of the works is now being carried out. The estimated cost being about £15000.

The removal of nightsoil refuse, ashes, etc, and the scavenging of the town has been efficiently carried out under the supervision of your Inspector of Nuisances.

The factories and workshops have on inspection been found to be in a satisfactory sanitary condition.

The registered lodging-house in Delph Road, (for men only) has been periodically visited, and generally found in a satisfactory state.

The food exposed for sale on the public market and in the shops has been frequently examined and generally found to be sound and wholesome, although 4 Cwts. of unsound fruit has been seized on the market and destroyed.

We have only two slaughter-houses in the town, a public one belonging to the Council, and the other one owned by the Great Harwood Industrial Co-operative Society, Ltd., and both are under the constant supervision of myself and the Inspector of Nuisances.

The Butchers are of a respectable class, and are very careful in the selection of cattle purchased for slaughter, although 840 lbs. of Tuberculous Beef, 7 Pig's Heads and 9 diseased Livers have been surrendered and destroyed under the supervision of your inspector.

The sanitary condition of the schools is satisfactory. Disinfectants are supplied to the caretakers for the purpose of flushing the closets, drains, cleaning school floors, etc.

The dairies and cowsheds have been found on inspection to be kept in a cleanly state.

The milk supply is excellent, being particularly wholesome, free from adulteration, and kept and distributed under cleanly conditions.

The tripe boiling works which are the property of the Council are frequently inspected, and are kept clean and sanitary.

HOUSING ACCOMMODATION.—As a result of correspondence with the Local Government Board regarding housing accommodation in the district, your Council directed that a special census should be taken with the object of finding the necessity for further accommodation, and a copy of the particulars thus obtained and furnished to the Council is enclosed herewith. No further action has been taken in the matter except that some of the houses where it seemed there might be overcrowding, were visited, with the result that a considerable improvement has taken place in the conditions found.

31 houses have been erected in the district, also a cotton weaving mill, a day school for girls and infants, and a Sunday school.

A few new streets have been formed, sewered, and paved, and some of the streets repaved.

I again consider the death-rate very low for a manufacturing district, and will bear favourable comparison with most other Lancashire Towns and Urban Districts.

In conclusion, I congratulate you on the satisfactory sanitary condition, and I earnestly thank you for the encouragement and support which you have always given me.

I am, gentlemen

Your obedient Servant,

JOHN PATCHETT,

Medical Officer of Health.

GREAT HARWOOD,

1st March, 1915

*To the Chairman and Members of the  
Great Harwood Urban District Council.*

Gentlemen,

I have the honour to submit to you my Annual Report for the year ending December 31st, 1914.

#### NUISANCES.

During the year 439 Nuisances have been dealt with, and 18 preliminary notices have been issued calling for the abatement of the same. The remainder have been remedied by verbal requests.

The Nuisances consisted of the following, viz :

Blocked Water Closets and Drains ... ..	379
Defective Slopwaste Pipes ... ..	3
Broken Tippers belonging to Waste Water Closets ... ..	18
Houses in a filthy condition ... ..	2
Accumulation of Refuse ... ..	9
Dirty Closets and Closet Areas ... ..	4
Blocked Street Gullies ... ..	14
Defective Ashbins ... ..	10

31 Legal Notices were served last year to carry out Sanitary works, which relate to the conversion of old tanks, covering of ashpits, &c., and reflagging of backyards, and the work will be carried out during the year.

## CLOSET ACCOMMODATION.

Below I give a statement of the present Closet Accommodation in the district.

Pail Closets (out districts)	...	...	36
Earthenware Tanks	...	...	120
Fresh Water Closets	...	...	412
Waste Water Closets	...	...	2663
Total			3331

It is the intention of the Council to abolish the existing 120 Earthenware Tanks as early as circumstances will permit.

## INFECTIOUS DISEASES.

During the year 137 cases of Infectious Disease have been notified, viz: Scarlet Fever, 82; Diphtheria and Membranous Croup, 15; Erysipelas, 12; Pulmonary Tuberculosis, 19; other Tuberculous Diseases, 5; Ophthalmia Neonatorum, 1; and Puerperal Fever, 3.

The cases were investigated and the particulars relating thereto were obtained and in due course reported to the Medical Officer of Health.

The drains and general surroundings were examined, and any nuisances found, dealt with immediately.

Disinfectants were supplied, verbal and printed instructions given as to isolation of patient, use of disinfectants, absence of children from schools, &c.

After the patient had recovered, the rooms, bedding, &c., were disinfected to the best advantage as circumstances would permit.

118 houses were so treated during the year.

HOUSING ACCOMMODATION.—As a result of correspondence with the Local Government Board regarding housing accommodation in the district, your Council directed that a special census should be taken with the object of finding the necessity for further accommodation, and a copy of the particulars thus obtained and furnished to the Council is enclosed herewith. No further action has been taken in the matter except that some of the houses where it seemed there might be overcrowding, were visited, with the result that a considerable improvement has taken place in the conditions found.

31 houses have been erected in the district, also a cotton weaving mill, a day school for girls and infants, and a Sunday school.

A few new streets have been formed, sewered, and paved, and some of the streets repaved.

The defects at 19 houses reported upon last year have not yet been carried out.

#### FACTORIES AND WORKSHOPS.

The Factories and Workshops have been kept under supervision, and the Sanitary conditions are in compliance with the laws relating thereto.

The following is a detailed list of Factories and Workshops on the register.

Cotton Weaving and Spinning Mills	...	23
Clog Makers ...	...	12
Bakers and Confectioners	...	24
Dressmakers and Milliners	...	14
Tailors ...	...	6
Wheelwrights	...	2
Tripe Boilers ...	...	3
Plumbers ...	...	3
Blacksmiths ...	...	2
Harness Makers	...	1
Rag Sorters ...	...	1
Monumental Masons	...	1
Printers ...	...	3
Total	...	95

### BLACK SMOKE.

16 observations were taken, and the stokers at some of the mills have been cautioned, but it has not been deemed necessary to take any action.

### SLAUGHTER HOUSES.

The Slaughter-houses are under constant supervision. After slaughter, offal is placed in galvanised iron receptacles and removed immediately by the Council's workmen.

### UN SOUND FOOD.

The following have been rejected as being unfit for human food, and with the consent of the owners, destroyed.

		Disease or Other Cause.	Weight in lbs.
1 Carcase of Beef	...	Tuberculosis	600
1 Quarter of Beef	...	"	240
7 Pigs' Heads	...	"	
9 Cows' Livers	...	Cysts	72
Fruit	...	Decomposition	448

### LODGING HOUSES.

4 visits have been made at the Lodging House in Delph Road (for men only) and it has generally been found fairly satisfactory.

### DAIRIES AND COWSHEDS.

The farms have received attention during the year, and the limewashing of shippons, &c., attended to.

The attention of the Estate Agent has been called to a Shippon, which was found on inspection to be badly lighted, insufficiently ventilated, defective floor, etc.

## GENERAL SANITARY MATTERS.

The Urinals have been regularly cleansed and disinfectant fluid freely used.

Fish refuse, &c., is collected from green-grocers shops six days per week, between 7 and 8-30 a.m.

The Public Market has been regularly cleansed.

## SCAVENGING AND NIGHTSOIL.

The staff in this department consists of eight labourers and four horsemen.

The majority of the receptacles for house refuse are built of brick and stone, and provided with proper doors and coverings.

We have also about 766 dustbins, and this system continues to grow, and no doubt is the most sanitary.

The principal streets are swept two and three times weekly throughout the year, and the bye streets once.

We have 36 Pail Closets in the out districts, and these are emptied weekly.

During the year the following number of loads of house refuse, &c., have been removed to the Council's tip :—

Ashes and Gulley Refuse	...	3615
Nightsoil	... ..	263
Street Sweepings & Shop Refuse		1019
Total	...	<hr/> 4897 loads

In conclusion, gentlemen, I have to thank you for the support you have given me during the year in all sanitary matters.

I am, Gentlemen,

Your obedient Servant,

ALBERT EDDLESTON,

Inspector of Nuisances.
